## About Us

Progresso Infosystems is a next-generation IT system integrator helping organizations modernize, secure, and scale their technology environments. We deliver practical, high-value solutions — from infrastructure and cybersecurity to cloud and AI — enabling businesses to reduce risk, improve operational efficiency, and accelerate growth.

Founded in 2018, we are a trusted technology partner for enterprises, institutions, and government organizations across India.

### **Mission**

Enable organizations to gain long-term advantage with secure, reliable, and scalable IT solutions—delivered with uncompromising quality.

### **Our Vision**

To be India's leading reliable IT integrator, delivering solutions that simplify and strengthen businesses. We strive to stand out through quality service, customer commitment, and continuous innovation.

## **Our Strategy**

Delivering smart IT solutions for growth with a focus on performance, scalability, and security. We aim to support businesses end-to-end—from consultation to implementation and ongoing service.

## **Our Philosophy**

We value integrity, innovation, and client success, ensuring every solution adds true business value. Our approach is built on transparency, quality delivery, and long-term relationships.

## **Core Values**

Integrity

Quality

Competency & Continuous Learning

Teamwork & Collaboration Efficiency

Accountability

Innovation

Confidentiality

We keep our commitments

Progresso Infosystems is one of the most trusted companies offering end-to-end Implementation Services across Cloud Computing, IT Storage & Backup, Salesforce, Cloud Infrastructure, IT Security Solutions, and Data Center Solutions all over India.

Our goal is to become one of the top IT system integrator companies in the region. Driving innovation through reliable and advanced technology solutions. We aim to empower businesses with seamless IT infrastructure and long-term digital growth.

## Our Services

We provide end-to-end technology solutions across the entire enterprise IT landscape, ensuring seamless integration, optimized performance, and strong security. Our expertise enables organizations to modernize, scale, and operate with greater efficiency and confidence.

- Cybersecurity
- Cloud & Infra
- Artificial Intelligence (AI)
- IT Hardware
- IT Security Services
- IT Software Solutions
- IT Implementation Services
- Data Center Solutions
- Cloud Computing

# Cyber Security:

In a threat landscape that evolves every day, businesses can't afford guesswork. Our cybersecurity services are built to detect, defend, and respond with precision. We secure your digital ecosystem end-to-end—so your teams can operate with confidence and your customers can trust every interaction.

Modern security frameworks to keep your organization protected against evolving threats.

## **CYBERSECURITY OPERATIONS**

- Secure SD-WAN Solutions
- Phishing Simulation

## **ADVISORY AND CONSULTING**

- VCISO-VDPO
- Security Advisory
- Cloud Compliance Advisory
- Incident Response
- Configuration Review Services

# Cloud & Infrastructure:

Modern businesses run on reliability, speed, and scalability. Our Cloud & Infrastructure services ensure your organization operates on a foundation that's secure, high-performing, and built for growth. Whether you're migrating legacy systems or optimizing existing environments, we deliver infrastructure that works—consistently and intelligently.

We help you modernize with cloud-native architectures, automate critical operations, and ensure seamless performance across every layer of your IT ecosystem. With robust security, proactive monitoring, and scalable designs, we empower your business to stay agile, resilient, and future-ready. Our solutions evolve with your needs—so you can focus on innovation while we handle the complexity behind the scenes.

- ✓ Enables faster deployment cycles with minimal disruption.
- ✓ Strengthens business continuity with resilient, fault-tolerant systems.
- ✓ Delivers optimized cloud cost management and resource utilization.
- ✓ Offers end-to-end visibility through centralized monitoring and analytics.
- ✓ Ensures compliance with industry standards and best-practice security frameworks.

- ✓ Supports hybrid and multi-cloud environments with smooth interoperability.
- ✓ Provides round-the-clock support to maintain peak system performance.
- ✓ Enhances scalability to meet fluctuating business demands effortlessly.
- ✓ Reduces operational complexity through intelligent automation workflows.
- ✓ Improves overall efficiency with streamlined infrastructure management.

## **MICROSOFT CLOUD SOLUTIONS**

- Microsoft 365 Migration
- Copilot Solutions
- Power BI and Fabric Solutions
- AZURE Solutions
- Microsoft 365 Security
- Sharepoint Solutions

## **MANAGED CLOUD SERVICES**

- Cloud Security Architecture
- Hybrid Cloud Implementation
- END-to-END Managed Services
- Cloud Optimization
- Cloud Resilience Solutions
- Multi-Cloud Strategy

## **BACKUP STORAGE AND DISASTER RECOVERY**

- Cloud and ON-PREM Backup
- Data Replication and Redundancy
- Load Balancing and Application Delivery
- Disaster Recovery Planning (DRP)
- Storage and HYPER-converged Storage

# Artificial Intelligence (AI):

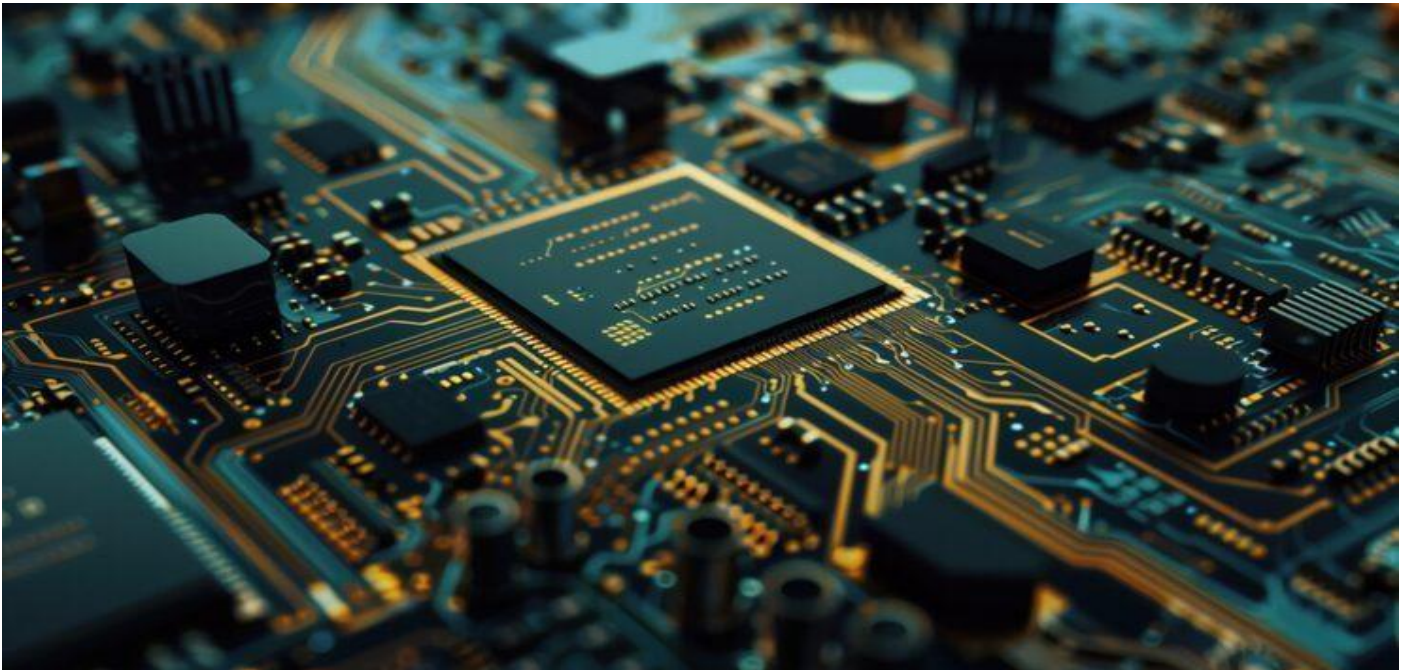

AI empowers organizations to reimagine how they operate, innovate, and deliver value. By combining data, automation, and intelligent algorithms, we help you transform routine workflows into smart, self-optimizing processes. Our solutions are designed to enhance customer experiences, reduce operational costs, and uncover insights that fuel continuous improvement.

With an emphasis on responsible AI practices, we ensure every implementation is transparent, ethical, and secure. Whether you're scaling existing models or exploring new AI-driven opportunities, we provide the technical expertise and strategic guidance to accelerate your journey with confidence.

**AI Strategy & Advisory**

**Custom AI & ML Solutions**

# IT Hardware:

Equipment is characterized as any actual part of a computer framework, regardless of whether it be a PC screen, tablet, or cell phone, just as ICs and other gadgets. Without equipment, our computers wouldn't exist, and programming couldn't be utilized. Being a notable IT integrator, we provide comprehensive IT Hardware Services and Software Solutions to our clients.

Clients like administrations for their opportune execution and adequacy. Other than these, we offer types of assistance to the clients according to their necessities just as at reasonable rates absolutely.

- Desktop – Dell, HP, Lenovo
- Laptop – Dell, HP, Lenovo
- Workstation – Dell, HP
- Thin Clients – Dell Wyse, Vxl, RDP, HP

# IT Security Services:

In the rise of Internet of Things (IoT) and the cloud, we are facing an increasing number of vulnerabilities in our organizations. Whether you're a small startup or a large enterprise, security should always be a top priority. To build a robust security program, information security is the first step — it forms the foundation of overall data protection.

IT Security Services we provide:

- DLP – Websense, Symantec, McAfee
- Vulnerability Scanning Software – Acunetix, GFI, Kaseya,
- Load Balancer – Array Networks, F5, Radware
- Wireless Solutions – Air Tight, Ruckus, Netgear, Aruba
- AntiSpam – Barracuda, Ironport
- Network Monitoring Software – WhatsUp Gold, Solarwinds, GFI
- WAN Acceleration & Optimization – Riverbed, Array Networks
- Log Analyzer & Event Correlation -Symantec SSIM, RSA Envision

# IT Software Solutions:

Over the previous decade, the speed of globalization has been generally determined by improvements in Information and Communication Technology (ICT). Consequently, IT experts have incredible demand in many domains — one among them being the delivery of software solutions for businesses. The development of IT software solutions to boost business productivity involves a range of skills and disciplines. Key to this process is awareness of changing business dynamics and the ability to keep pace with rapid technological evolution.

At CloudAce, we will provide all software licenses from IBM, Microsoft, Auto CAD, Red Hat, Adobe and other providers.

- Licenses
- Oracle
- IBM Software
- Adode
- Auto CAD
- Redhat

# IT Implementation Support Services:

We, at Progresso Infosystems, provide exemplary implementation services to monitor and manage your organization's network security challenges. We analyze your network, identify vulnerabilities, and design a suitable IT Implementation strategy that addresses your specific needs. Our services include Antivirus Implementation Security Services along with carefully prepared Implementation Manuals to ensure seamless execution.

- Gateway Firewall Implementation Services
- Web Application Firewall (WAF) Implementation
- Web/Content Filtering Implementation
- Antispam Implementation Services
- Intrusion Prevention System (IPS) Implementation
- Encryption Implementation Services
- Vulnerability Scanning Implementation
- Two-Factor Authentication (2FA) Implementation

# Data Center Solutions:

Data Center solutions define the products and services required to build and maintain a data center. Depending on size and requirements, a business may operate its own data centers or share space within a multi-tenant facility.

Solutions can include setup and maintenance of specific racks, or extend to planning and constructing an entirely dedicated, new data center.

## Our Data Center Solutions

- Network Racks – Netfox, Netrack, Valrack
- Server Racks – Netfox, Netrack, Valrack
- Intelligence PDU – Raritan Energy Management Solutions
- Switch – Brocade, Dell, CISCO, HP, Juniper
- Router – CISCO, Juinper, HP

# Cloud Computing Services:

We deliver end-to-end Cloud Computing solutions designed to meet the evolving needs of modern businesses. Our team provides reliable, scalable, and secure cloud infrastructure built using the latest technologies. With strong AWS expertise, we design, deploy, and manage new or existing cloud environments—on time and within budget. Clients benefit from efficient remote solutions, faster operations, and infrastructure aligned with industry standards.

## Cloud Services We Provide:

- Virtual Private Server
- Dedicated Server
- Cloud Server
- Cloud Backup
- Colocation Services
- Disaster Recovery Services
- Cloud Storage
